

CLAIMS

1. A transparent elastomer composition comprising an elastomer and fluorine-containing resin fine particles which are finely  
5 dispersed in the elastomer.

2. A composition comprising a transparent elastomer composition which comprises an elastomer and fluorine-containing resin fine particles which are finely dispersed in the elastomer and  
10 further containing a filler.

*Sub A* 3. The composition of Claim 1 or 2, wherein the elastomer is a fluorine-containing elastomer.

15 4. The composition of any of Claims 1 to 3, wherein the composition contains a crosslinking agent.

5. The composition of any of Claims 1 to 4, wherein the transparent elastomer composition has a haze value of not more than  
20 50 %.

6. A process for preparing the transparent elastomer composition of Claim 1, which comprises mixing an emulsion of elastomer particles and an emulsion of fluorine-containing resin fine  
25 particles, and co-coagulating the mixture.
